Corporate Policy of Metallux AG

The principles listed here represent the company's commitment to environmental protection and the assurance of quality. They secure the success of our company.

1. Customer Satisfaction
Meeting customer requirements in a spirit of partnership ensures the company's continued existence.

2. Investments
Ongoing investments keep us at the cutting edge of technology.

3. Quality and Environmental Awareness
Promoting responsibility and understanding among all employees for their activities.

4. Continuous Improvement
To maintain our position as a reliable partner to satisfied customers and to preserve an intact environment.

5. Employee Satisfaction
As a motivator for improving quality and environmental performance.

6. Certification of our Integrated Management System according to DIN EN ISO 9001 and targeted certification according to DIN EN ISO 14001
The integrated management system and audits support the implementation of our quality and environmental principles.

7. Risk Minimization
By raising awareness of and regularly assessing process and environmental risks, we improve and qualify our processes.

8. Supply Chain
We work with our suppliers in a spirit of trust and partnership.

9. Compliance with Legal Requirements

We comply with official regulations and legal requirements to act in accordance with the law.

10. Resource Conservation

Throughout our entire value chain, we strive for the most efficient use of materials and energy.

11. Waste Reduction

By separating recyclables and residual waste, we aim for the highest possible recycling rate.

12. Sustainability

We motivate our suppliers and customers, for example, to use reusable packaging. Our materials should, wherever possible, be returned to the recycling cycle.
When procuring our energy sources, we pay attention to climate protection whenever possible, for example through electromobility and green electricity.

The goal of this corporate policy is to harmonize profitability, quality, and environmental protection.

Management as well as the quality and environmental management representative are responsible for monitoring, optimizing, and further developing the management system.

Executives are expected to lead by example.

Every employee is obligated to meet the requirements and tasks arising from our integrated management system.
